

Alabama Prevention Programs

2015-2021 BY THE NUMBERS

The Alabama Department of Child Abuse and Neglect Prevention under the leadership of Sallye Longshore, Director, has documented in just the last 6 years a **broad distribution of resources and outreach** to the citizens of Alabama through a large number of community-based agencies and organizations. These efforts have **enhanced protective factors** that are associated with the **reduction of risks** and the significant human and economic cost of child abuse and neglect in our state.

ADCANP has a
38 year history

of collaborating with community-based agencies and organizations that serve children and families in Alabama.

Over \$38 million

has been awarded through a competitive grant process to community-based agencies to support prevention programs.

\$31,404,421

was awarded for programs serving parents.

\$7,264,652

was awarded for programs serving youth.

The available funding for program awards **increased from 2015 to 2021 by 415%.**

213,952 adults

participated in multi-session programs.

336,917 youth

participated in multi-session programs.

3,920,631 individuals

individuals impacted by public awareness activities.

45,296,417 citizens

viewed prevention information through various media outlets.

More than 180

different prevention programs for youth and parents have been provided.

Over 500 front-line workers

are involved annually around the state in providing prevention programs and services.

Over 80

local, state, and national presentations and publications have been presented on the prevention program evaluation findings.

All 7 districts

and **100% of counties** in Alabama were directly impacted by prevention program resources provided by ADCANP.

Over 110 different agencies

around the state have been funded to provide prevention programs in their communities.

Over 100 undergraduate and graduate students

at Auburn University have been involved in learning about and reporting on program evaluations for prevention programs in Alabama.

100% of target outcomes

for parenting and home visitation programs, fatherhood programs, respite care programs, and youth programs show **statistically significant improvements** after program participation. These outcomes are indicators of enhanced protective factors for children.
